

GAIN CONTROL AND VISIBILITY OF YOUR MOBILE ENTERPRISE

- OPTIMIZATION
- ASSET MANAGEMENT
- PROCESS MANAGEMENT
- MANAGED SOLUTIONS

The use of mobile devices has grown exponentially in the last several years. Whether your company is large or small, dependence on wireless services for the flow of mission-critical communications has dramatically increased – and so has the cost to your business.

American Business Communication (ABC) will help you navigate the challenges of escalating costs and complex blend of carriers, mobile devices, services and solutions to meet your individual business needs.

SERVICES CUSTOMIZED FOR YOUR ENVIRONMENT

As businesses demand more from their mobile communications and the emerging technologies for wireless integration and mobile convergence – the need to proactively manage, reduce costs and complexity across entire telecommunications enterprise is more vital than ever.

ABC is a partner you can trust to provide the expertise, resources and industry knowledge to deliver solutions right-sized to meet your company expanding needs:

- **Reduce Costs.** Rate analysis and optimization
- **Visibility.** Asset management, inventory control and procurement solutions
- **Control.** Expense management, technology assessment and planning
- **Managed Mobility Solutions.** Comprehensive solutions

ABC ADVANTAGE

"Adoption of new technologies is expected to grow at record rates as cell phones and other mobile devices become ever-more sophisticated tools for communication, productivity and commerce. While voice & data usage plans can spin out of control if not properly negotiated, numerous other hidden costs can also erode the real value of mobility-enabled productivity." Rely on ABC to be your partner and resource in mobility management – so you can focus on your core business.
